PROFESSIONAL SUMMARY

Full-stack Software Developer (3+ yrs, Amdocs) building production systems across React, Node.js, Java, Python, and C++, with hands-on GenAI integration experience (Gemini 1.5 Pro). Track record of maintaining and optimizing large-scale billing, REST API, and reconciliation systems serving millions of customers through close cross-functional collaboration with billing and operations teams, plus independently building AI-native products from scratch.

PROFESSIONAL EXPERIENCE

AMDOCS

Pune, Maharashtra

Software Developer

Jul 2025 – Present

- Led development of ComcastHub, a centralized developer tooling to **boost productivity by 15–20%**, deployed on AWS for scalability and ensuring UI reliability with Jest; built with Next.js, React, TypeScript, and Tailwind.
- Automated **85%** of daily billing workflows with Cipher EOC - Python/Streamlit tool, **cutting execution time from 90 to 40 minutes** using Oracle DB, Paramiko SSH, and Selenium Edge, validated with PyTest.
- Implemented a config-driven **Unlimited Premium EIP credit engine** for Charter (31M+ customers) in Amdocs billing layer, netting installment charges against promo offsets and crediting only eligible active subscriber lines.
- Developed the **GenAI-powered** BPT Charge Code Tool in Python to automate Excel parsing and relational SQL script generation, reducing manual data entry and deployment errors by **90%**.

Software Engineer Associate

Jul 2023 – Jul 2025

- Established the **reconciliation subsystem** for Amdocs **Comcast BriteBill migration** (10M+ customers) – a C++ daemon ingesting reconciliation files and auto-flagging rejected accounts for reprocessing.
- Engineered Add and Get Service Promotion **REST endpoints in Java** within a multi-tenant **Service Promotion Framework**, handling subscriber-scoped promo lifecycle logic — creation, retrieval, and plan-state configuration — for a national carrier subscriber base of **1.4M+**.
- Extended APEye's job orchestration framework with a custom **Jenkins integration**, introducing a new RunJobs extension to onboard Invoicing test jobs into the pipeline — collapsing regression cycles from **5 hours to 1 hour**.

KEY PROJECTS

YOU – GenAI Clinical Wellness Platform [UI Demo]

Mar 2026 – Present

Pioneered a real-time wellness platform featuring chat, clinical journaling, and automated therapist matching.

- Architected real-time chat infrastructure with React, TypeScript, **Firestore under 150 ms sync**; built Firestore Security Rules **ensuring PII protection with RBAC** based access control.
- Designed the AI backend pipeline using **Gemini 1.5 Pro** to process journals and stream grounding exercises, enabling 24/7 care access; plus an automated **PHQ-9-based therapist-matching** workflow secured with JWT authentication.

STREAMER – Live Streaming Platform [GitHub]

Jan 2022 – Apr 2022

Architected for real-time video distribution and high-availability multi-channel broadcasting.

- Developed a multi-channel streaming prototype using **React, Node.js** with WebSocket streaming and OBS integration for real-time video distribution; secured with Google OAuth 2.0.

TECHNICAL SKILLS

Languages: Python, Core Java, C++, Javascript, TypeScript, SQL, HTML5, CSS3

Web & Frameworks: React 18, Next.js 14, Node.js, Streamlit, Tailwind CSS

Backend & Testing: Microservices, REST APIs, WebSockets, PyTest, JUnit, Jest, JWT, OAuth 2.0

Cloud & Databases: AWS, Docker, Jenkins, CI/CD, PostgreSQL, MySQL, Oracle, Firebase, Linux, UNIX, Maven

AI & Dev Tools: Gemini 1.5 Pro, Cursor, Copilot, MCP, Git/Github, Stitch, Selenium, Paramiko

System Design & Core CS: High-Level Design (HLD), Low-Level Design (LLD), Data Structures Algorithms (DSA), Object-Oriented Programming (OOPS), SDLC, Agile (Scrum)

EDUCATION

Thapar Institute of Engineering and Technology

Patiala, Punjab

Bachelor of Engineering (B.E.) in Computer Engineering

Jul 2019 – Jul 2023
